

WHITEPAPER

#1Cent

"SHIBA INU AT \$0.01 IS POSSIBLE, YOU JUST NEED TIME AND YOU
BURN"

INTRODUCTION

It is a token made for the Shiba Inu ecosystem community, specifically the present and future shib holders, and its main objective is for the Shiba Inu to reach \$0.01 cents, contributing weekly burns of the SHIB ERC20 network token and thus reduce the supply and revaluing its value over time.

MISSION VISION

MISSION: We have a clear objective that Shiba Inu reaches \$0.01 cent

VISION: 1Cent will become the largest SHIB token burning site in the future, reaching the prices considered impossible \$0.01, \$0.10 and \$1.00 respectively.

Tokenomics
1cent token

OUR PROJECT

We are convinced that each and every one of the holders of the Shiba Inu project must and must invest in 1Cent, since with this we will achieve that SHIB reaches \$0.01, without being certain that this price is the beginning of the objectives considered impossible, we are talking about seeing Shiba Inu at \$0.10 and the dream of \$1.00 dollar, 1Cent will be a great contribution to achieve these goals that are now only a dream, but in the course of time they will be a reality.

1CENT-TOKEN

1Cent launches on March 08, 2022 with a single mission, to make the Shiba Inu token reach \$0.01, however, this token will not only burn Shiba Inu, but also give Bitcoin for keeping in your 1Cent wallet, our main mission and focus will take 1Cent to the top. We estimate a revaluation of 1000X in the first two years since with only 5% of Shib holders we will achieve the goal.

WHY INVEST IN 1CENT?

Our mission and vision is firm and promising, and it is what will lead 1Cent to reach unimaginable prices, all 1Cent holders will be able to earn in three ways:

1. Burn the largest amount of the Shib token, thus revaluing our investment in Shib over time.
2. The reward will be given in Bitcoin, we know that btc is not to sell but to keep in the long term we will have secure Rewards in Bitcoin for keeping 1Cent for life.
3. For the revaluation of our valuable 1Cent token.

REWARDS

The rewards are granted with the BSC contract number of the Bitcoin network: 0x7130d2a12b9bcbfae4f2634d864a1ee1ce3ead9c, which you must add in your Metamask or Trust Wallet and once received, you can save it in the wallet or send it to BINANCE through the Smart Chain network. from Binance (BEP20), already on Binance you can hold or exchange it to BUSD, USDT or stake it, you can also send it to any centralized exchange that supports this BSC network.

The burnings will be carried out weekly on Sundays between 03:00 and 04:55 UTC LIVE and direct, through Google meet and will be invited through a link in the official telegram groups in Spanish and English, the accumulated 7% of each transaction of the whole week, once the burning is done, it will be published on all official social networks and on the official page 1Centdream.online, where the current weekly burning, the previous ones and the accumulated total of both Shiba Inu and the token will be shown 1Cent, enclosing the burning link of Etherscan (SHIB) and BSCSCAN (1Cent).

SHIBA INU BURN PROCEDURE!

1Cent is a token that is on the Binance Blockchain (BSC), while Shiba Inu is on the Ethereum Blockchain, so you may be wondering how it is possible to execute a burn if they are both on Blockchains. different. Here is a brief explanation.

12% of 1Cent tokens, which is the sum of 5% marketing and 7% burning, are sent to a metamask wallet.

On Sunday between 03:00 and 04:30 UTC the burning of Shiba Inu begins, which is done by sending them to the dead wallet of shibburn.com,

Bitcoin rewards are currently at 1%, that is, from 12% of rewards they were lowered to 1%, this in order to raise capital to carry out the second audit of the 1Cent token with CERTIK, the cost of this is \$55,000 dollars more corrections after the audit, that is, the update after the audit to correct the contract errors have an extra cost that must also be considered, this decision was not made by the devs, it was made in common agreement by the 1Cent community, through a vote on the official telegram and won by majority vote.

SPECIFIC TOPICS

Our token does not belong to the Shiba Inu Ecosystem, 1Cent 🔥 was created by SHIBA Holders diamond hands, the mission is known to burn as many SHIBA INU as possible, and we are certain and convinced that this purpose will drag 1Cent 🔥 to unimaginable levels we want SHIBA at \$0.01 but also 1Cent 🔥 at \$0.01... and we're going to make it... hold on

WHAT'S NEXT FOR 1CENT-TOKEN

1Cent is the Start 🚀
